

CLAIMS

What is claimed is:

1. A trunk space storage system comprising:
a hinge;
5 a frame; and
a storage pouch.
2. The trunk space storage system as in claim 1, wherein said frame further comprises a rigid material.
3. The trunk space storage system as in claim 1, wherein said storage pouch
10 further comprises a flexible material.
4. The trunk space storage system as in claim 1, wherein said frame is expandable to increase storage space as the user desires.
4. The trunk space storage system as in claim 1, wherein said frame is rotatably associated with said hinge to achieve deployed position or stowed position; said
15 storage pouch flexibly attached to said frame.
5. The trunk space storage system as in claim 4, wherein said frame rotates upward about said hinge; said storage pouch opens to achieve said deployed position.
6. The trunk storage space as in claim 4, wherein said frame rotates downward about said hinge; said storage pouch bends and folds into trunk opening wall
20 to achieve said stowed position.
